

PRESS RELEASE

Vaulx-en-Velin, France 1st of July 2024

T&G becomes 'Lineo

'Lineo (formerly "T&G"), is a network of 6 agencies providing solutions and services for industrial actors and professionals in the wood, leather, plastic and metal sectors in France, Belgium and Spain. The name change to 'Lineo applies to the French branches in Lyon, Nantes, Toulouse, Lille, Chalon-sur-Saône and Arbois. Belgian and Spanish branches will be affected in the near future.

Nastassja GENTES, Chief Operating Officer of 'Lineo France, stated: « *'Lineo has built its identity around strong expertise, recently reinforced by the acquisition of Vernijura in France, a recognized Jura-based specialist in supporting building and decoration professionals. By merging our entities, we are consolidating the 'Lineo network's offering, while at the same time creating virtuous synergies between our different industrial activities, enabling us to address highly promising specific fields of activity and meet effectively our partners' demands. This is why, beyond the name change, our objective is to federate around a unified identity, conveyed by all our ranges, and thus benefit from more relevant referencing in our markets.*».

As a reminder, 'Lineo produces and markets its own ranges, variations of liquid products for manufacturing materials, fittings and equipment, for all sectors of activity:

- *B'Lineo*: professional products to protect and decorate wood and wood products
- *F'Lineo*: intumescent products for indoor and sheltered outdoor wood
- *M'Lineo*: coating systems for metal substrates
- *A'Lineo*: multi-material bonding solutions
- *P'Lineo*: tinted products for all plastic substrates
- *D'Lineo*: a complete range of thinners
- *N'Lineo*: solutions for cleaning installations, equipment and tools
- *Color'Lineo*: a palette of 6,800 shades
- *Vernijura*: a wide range of paints and varnishes for the industrial, marine, construction and wooden toy sectors.

[ABOUT 'Lineo](#)

'Lineo is a network of European agencies (France, Belgium, Spain) supplying solutions for wood, metal, glass, plastic, composite and leather materials in all their forms. Its range extends from preservation solutions to finishes, with treatment (for the Belgian and Spanish branches), decorative and protective properties (climatic aggression, fire, etc.), as well as equipment and tools for preparing and applying materials (abrasives, glues, brushes, sprayers, personal protective equipment, etc.).
